

CARE OF YOUR SILGRANIT SINK

GENERAL CARE & CLEANING: Daily cleaning may be done with any non-abrasive cleaner (i.e. BLANCOCLEAN Composite Sink Cleaner).

After every use, rinse and wipe the sink dry with a clean, soft cloth to eliminate any water spots or soap film build-ups.
REMOVING STAINS AND MINOR SCUFF MARKS: Normal Stains ~ For stains, please use BLANCOCLEAN, along with a soft scouring pad.

Stubborn Stains ~ A solution of 50% bleach, 50% water should only be used for tough, stubborn stains.

Let the solution sit in the bottom of the sink for one hour; then scrub. Rinse well. Also, the use of Bar Keepers Friend

(directions included on bottle) will help remove stubborn stains. Finally, clean with BLANCOCLEAN to put a protective

coating back on the sink's surface. **LUSTER:** BLANCOCLEAN can be used to help bring back the luster. Follow the directions on the bottle. **MISCELLANEOUS:** To remove Calcium Deposits (a white ring around the bottom of your sink): use LIME AWAY To remove Adhesive Labels : use Acetone (nail polish remover)

Note: Always test non-Blanco branded stain remover in a small, non-visible location
Note: Always test non-Blanco branded stain remover in a small, non-visible location
WHAT NOT TO USE: 1) Do not use any abrasive cleaning agents or scrub pads, such as Steel Wool

2) Straight bleach

3) Commercial alkalis, such as ammonia and/or caustic solutions

4) Drain blocking chemicals that involve filling the sink with water
