

## ***Routine Care and Maintenance***

Mystera™ is non-porous, mold, stain, and fire resistant surface, making this surface material a cost-effective investment. The colors of these surfaces go all the way through each piece. General care is as simple as wiping the surface with a damp cloth. If a stain should develop, wipe it away with soap and water. Or if you prefer, wipe it clean with a non-abrasive household cleaner such as Windex or Formula 409. If the stain does not respond to soap and water or a household cleaner, for a matte finish, buff with a wet white scotch-bright pad, using a circular motion. The same technique can be used in the case of a cigarette burns, minor cuts, and scratches. Fabricators utilize various methods to achieve satin and high gloss finishes. If you have a satin or gloss finish, or are not sure which finish you have, please contact your dealer or fabricator for repair assistance.

### **Helpful Hints**

Use felt protectors on the bottom of hard objects and avoid sliding them across the surface of your countertop, especially with satin and high gloss finishes and/or dark colors. For high gloss counters, place felt protectors on the bottom of pottery or other hard objects.

Always use a hot pad or trivet under hot pots or heat producing appliances.

Always use a cutting board.

Avoid harsh chemicals such as a stove or drain cleaner, paint remover, nail polish remover, etc.
